

Hardware and energy cost to train notable AI systems

This data is expressed in US dollars, adjusted for inflation.

Cost (constant 2023 US\$; plotted on a logarithmic axis)

Data source: Epoch AI (2025)

Note: This data is expressed in constant 2023 US\$. The hardware costs are amortized and calculated by multiplying the training chip-hours by the reduced hardware cost, with an additional 23% for networking expenses. The costs of some models vary in certainty, as some use actual price data rather than estimates.
